Memo to File:

RE: <sup>MINEALS</sup> Getty Oil Company  
Mercur Project  
ACT/045/017  
Tooele County, Utah

Mary Boucek and Pamela Grubaugh-Littig toured the Mercur Project with Glenn Eurick on June 30, 1983. We visited reclamation sites that have been seeded for one or two years, as well as proposed sites that will be seeded this fall. We observed the deer fences by the tailing dam and where they will be repaired. The construction of the tailing dam with Mr. Hullinger's fill material was also noted.

Mr. Eurick expressed an interest in having a biologist visit next spring to help key out native vegetation.

PAMELA GRUBAUGH-LITTIG  
RECLAMATION ENGINEER
